

Dear Transplant Nurse,

Thank You for being there for me, and so many other transplantees who have felt your kindness as we worried the night before surgery! ...for being there when we awoke and for all you did to make our recovery speedy, successful, and pleasant.

You encouraged us to get out of bed; walk even if it was painful, and we were scared we would "hurt" the new kidney! You did not laugh at our fears; you treated us with respect and unlimited kindness. You treated each as if we were you only patient and you had time to answer all our questions.

Thank you for sharing not only your professional skills, but your self with us. Thank you for remembering us, by name, when passing us in the hallways on clinic days... and forgive us who in our excitement, joy, and filled with life anew, forget to come back to say a profound "Thank You!" *I planned to do that...*

...so I take the time now to say "Thank You," to you, and to all Transplant nurses everywhere... You are One Special Bunch of Folks! May God bless you All!

A grateful beneficiary of your love and kindness

*Betsy*
