

*Dear Transplant Nurse:*

*July 9, 2006 my husband had a heart transplant at Sutter Memorial Hospital. Prior to his transplant he had been diagnosed with Dilated Cardiomyopathy, due to a virus. I remember not sleeping at night in fear my husband would not make it through the night. Then 17 days after he was listed he received his second chance.*

*The transplant nurses were fabulous not only to my husband but to me also. They were professional, sooo caring, understanding, at the top of their field. Thank you so much for all that you do. All the lives you save and for bringing our loved ones back to us.*

*Always,*

*Cynthia Phillips*
